Having 15 years of academic and research experience in diverse environments of 10 universities, Dr. Faisal Sultan Qadri is currently working as a Research Economist / Assistant Professor at the Applied Economics Research Centre (A.E.R.C), University of Karachi. His core expertise in quantitative research includes time series analysis, cross-section analysis, panel data analysis, and macroeconomic modeling while at the qualitative research side, it includes meta-analysis and structural equation modeling. He completed his MPhil (Applied Economics) and PhD (Economics) from the University of Karachi.

Besides this, he has also been serving as an analyst at various television channels including the state channel PTV News. He has numerous research publications based on time series, cross-sectional, and macroeconomic modeling to his credit. He has also been serving as a reviewer to various high-valued research journals such as Economic Modelling (published by Elsevier) and Journal of Economic Growth (published by Springer). Recently, he authored a book related to the economic challenges associated with COVID-19 published by RIPHAH Institute of Public Policy.
